

The Cascade Nero cladding panels by Alfresco is the future of sustainable timber facades. They are a combination of ground breaking sustainable design & state of the art production.

Produced in India by Himalaya Global in the advanced 1,00,000 Sq ft production plant, Cascade Nero panels are our new variation in the already popular and market leading Cascade Panels. Cascade Nero is made of 60% natural timber and 40% recycled polymer. The panel's construction is a wood plastic composite (WPC) core encased by a hybrid high performance polymer capping.

The Cascade Nero panels are designed to look like natural timber but need zero maintenance.

A design that is both
Beautiful & Practical

Profile shown: Nero Berlin

In an horizontal application our unique taper in the design ensures the rainwater flows smoothly without any stagnation. This ensures stability of the profile and guards against any leakages into the building structure.
